PROFESSIONAL SUMMARY

Full Stack & AI Engineer specializing in **Agentic Workflows**, **AIOps**, and **RAG Systems**. Expert in orchestrating autonomous microservices using **FastAPI**, **n8n**, and **Docker**. Proven track record of building self-healing systems and AI-driven automation that integrates LLMs (Gemini, Vapi) with structured enterprise data (SQL, MCP) to reduce operational costs and enhance efficiency.

TECHNICAL SKILLS

Core & Backend: Python (**FastAPI**), TypeScript, Node.js, SQL, **Model Context Protocol (MCP)**.
AI & Automation: **n8n**, **Agentic AI**, RAG Systems, Vector DBs (Astra/Supabase), Gemini API, Vapi.
Frontend: React.js, Next.js 15, Tailwind CSS, Zustand, React Query.
DevOps & Tools: **Docker**, Microservices Architecture, Git, CI/CD, Event-Driven Architecture.

WORK EXPERIENCE

Mobelite / *Software Engineering Intern* Feb 2025 – Jun 2025

- Developed scalable web solutions using **React.js** and **TypeScript**, contributing to production codebases.
- Implemented **RAG architectures** utilizing **Astra DB** and **Gemini API** to enhance internal knowledge retrieval.
- Optimized frontend performance, achieving a 20% reduction in load times via clean architecture standards.

Freelance (Call Center) / *Full Stack & AI Voice Engineer* Jun 2025 – Oct 2025

- Engineered an **AI-powered cold calling platform** using **Next.js** and **Vapi**, automating 10,000+ monthly calls.
- Integrated **Supabase** for real-time analytics, achieving **99.5% uptime** and instant lead qualification.
- Reduced call initiation latency by **40%** through global state management optimizations (Zustand).

PROJECT EXPERIENCE

Sentinel: Autonomous AIOps & Self-Healing Agent / *Python, FastAPI, Docker, Gemini*

- Architected an event-driven **DevOps agent** that monitors microservices, detects crashes, and auto-generates fixes in real-time.
- Implemented a **Symbolic RAG** (LLM-Backed Semantic Cache) using SQLite, reducing AI inference costs by **90%** by caching recurring error solutions.
- Designed a fully containerized **Docker** environment where the agent autonomously performs root-cause analysis.

TitanFlow: Agentic AI Sales System / *n8n, FastAPI, MCP, Docker*

- Built an autonomous inbound sales agent using **n8n** for orchestration and **FastAPI** for custom reasoning logic.
- Implemented **Model Context Protocol (MCP)** to connect LLMs with a local pricing database and CRM, enabling the AI to verify services and score leads accurately.
- Automated the full RFP lifecycle: parsing PDFs, calculating VIP scores, and drafting personalized quote emails without human intervention.

AI-Driven Mental Health Platform / *Next.js, TypeScript, RAG*

- Built a personalized well-being app featuring a **RAG-based chatbot** (Gemini + Astra DB) with **92% emotion recognition accuracy**.
- Reduced deployment overhead by **30%** through the integration of Sanity CMS and Clerk authentication.

Eb7ath (DevFest Hackathon Winner) / *Lead Frontend Developer* Dec 2023

- First Place Winner:** Developed a humanitarian facial recognition app to reunite families during crises.

EDUCATION

Higher Institute of Applied Sciences and Technology (ISSATSO) Sousse, Tunisia

- Master's in Intelligent Pervasive Systems** (Expected Jun 2027)
- Bachelor's in Software Engineering** (Graduated Jun 2025)
